DISCIPLINE WORKING PROGRAM

DISASTER MEDICINE

Speciality 31.05.01 General medicine

Form of education full-time

Rostov-on-Don
2023

I. GOALS AND OBJECTIVES OF MASTERING THE DISCIPLINE

DistinctiveA special feature of this program is the use of e-learning and distance learning technologies, the main elements of which are used in the work: online educational platforms; digital educational resources posted on educational websites; video lectures; email, etc.

It is possible to conduct individual lessons using e-learning and distance learning technologies for students who missed classes for a valid reason.

Goalsmastering the discipline:formation of a culture of safety, readiness and ability to act as intended in various types of emergency situations (ES) in peacetime and war.

The implementation of goals is achieved by solving the following main tasks:

a) understanding:

- problems, threats and risks associated with human life in everyday conditions;
- risks caused by the impact of damaging factors of various types of emergency situations;
- risks associated with the use of modern means of armed warfare;
- the role and importance of health care professionals in eliminating the health consequences of emergency situations;
- features of the supply of medical and sanitary equipment to formations and institutions operating in centers of mass destruction in peacetime and wartime;
- the need to understand the fundamentals of scientific analysis in the field of safety in general and medical safety in particular.

b) acquisitions:

- knowledge about the essence and development of major accidents and disasters, the subsequent formation of emergencies in a particular territory (object), about the creation and functioning of the Unified State System for the Prevention and Elimination of Emergency Situations (RSChS);
- knowledge on organizing the functioning and improvement of the system of health care for the population in emergencies, organizing the provision of first aid and pre-medical care to victims of emergencies in peacetime and war;

c) formations:

- culture of professional safety. Ability to identify hazards and assess risks in the field of their professional activities;
- ability and readiness to organize medical and sanitary provision of the population during liquidation of the consequences of emergencies of a natural, man-made and social nature;
- abilities for competent and reasoned justification of management decisions made from a safety point of view;
- motivation and ability to independently improve the level of safety culture;
- elements of IT competencies.

II. REQUIREMENTS FOR THE RESULTS OF MASTERING THE DISCIPLINE

The study of the discipline is aimed at developing competencies in accordance with the Federal State Educational Standard of Higher Education and the EP of Higher Education in this specialty:

2.1 Universal: UK-8

III. THE PLACE OF DISCIPLINE IN THE STRUCTURE OF EP VO

3.1. The discipline refers to the mandatory part of the educational relationship formed by the participants and is a basic (mandatory) part of the professional cycle of disciplines.

As a result of mastering the discipline, the student must:

Know:

- causes, signs and consequences of hazards, methods of protection from dangerous situations;
- basics of organizing medical and evacuation measures during emergencies in peacetime and wartime;
- ways and means of protecting the population, patients, medical personnel and medical property;
- basics of providing various types of medical care during emergencies;
- basics of organizing and carrying out sanitary and anti-epidemic measures during emergencies;
- Organization of medical supplies to formations and institutions during emergencies;
- the procedure for interaction between medical units and institutions during the liquidation of consequences in the affected areas.

Be able to:

- independently use theoretical sources to expand knowledge about life safety;
- identify signs, causes and conditions for the occurrence of dangerous situations;
- assess the likelihood of a potential hazard and take measures to eliminate it;
- provide first aid to the affected population during an emergency;
- fulfill their functional duties when working in formations and institutions of the MK service;
- use medical protective equipment in a qualified manner;
- carry out SG and PE measures in the affected areas.

Own:

- professional language in this field;
- analytical skills in identifying and assessing various explosive hazards;
- legislative and regulatory framework to ensure the safety of medical workers and the provision of medical services.

Trainees will have developed elements of IT competencies.

IV. CONTENT AND STRUCTURE OF DISCIPLINE
Labor intensity of the discipline in 3 hours 108

4.1. Sections of the discipline studied in the 7th semester

No. section	Section name	Number of hours					SRO*
		Total	Contact Job				
			L	WIT H	ET C		
Semester 7							

1	Emergency Medicine Interim certification form exam	108	12		32	36	28
Total:		108	12		32	36	28

4.2. Contact work

Lectures

No. section	No. lectures	Lecture topics	Number of hours
Semester 7			
I	Topic No. 1	Objectives, organizational structure of the All-Russian Disaster Medicine Service	2 hours
	Topic No. 2	Fundamentals of medical and evacuation support for the population during emergencies and terrorist attacks	2 hours
	Topic No. 3	Peculiarities of MSO of the population during liquidation of consequences of accidents at chemical waste facilities and	2 hours
	Topic No. 4	Features of MCO of the population during liquidation of consequences of natural emergencies	2 hours
	Topic No. 5	Sanitary and anti-epidemic measures during emergency response	2 hours
	Topic No. 6	Organization of medical supplies in emergencies	2 hours

Practical work

No. section	No. ETC	Topics practical work	Number of hours	Forms of current control
Semester 7				
I	1	Organizational structure and characteristics of formations and institutions of the VSMC	PR – 2	Oral questioning, interview, test

No. section	No. ETC	Topicspractical work	Number of hours	Forms of current control
	2	The essence of the medical evacuation support system and the basic requirements for it	PR – 2	Oral questioning, interview, test
	3	Features of the organization of emergency management during peacetime and wartime emergencies	PR – 4	Oral questioning, interview, test
	4	Medical and sanitary provision of the population during liquidation of the consequences of chemical emergencies	PR – 4	Oral questioning, interview, test
	5	Medical and sanitary provision of the population during liquidation of the consequences of emergency situations of radiation nature.	PR – 4	Oral questioning, interview, test
	6	Medical and sanitary provision of the population during liquidation of the consequences of natural emergencies and terrorist acts	PR – 2	Oral questioning, interview, test
	7	Medical and sanitary provision of the population during liquidation of the consequences of emergency situations of road transport, explosion and fire hazards	PR – 2	Oral questioning, interview, test
	8	Basics of organizing and conducting sanitary and anti-epidemic measures among the population during emergencies	PR – 4	Oral questioning, interview, test
	9	Objectives and principles of supplying medical equipment to QMS formations and institutions	PR – 4	Oral questioning, interview, test
	10	Medical property. Storage procedure, accounting and reporting	PR – 4	Oral questioning, interview, test

4.3. Independent work of students

No. section	Type of independent work of students	Number of hours	Forms of current control
Semester 7			

No. section	Type of independent work of students	Number of hours	Forms of current control
I	Reading the textbook text. Preparing messages for presentation at the seminar. Drawing up a plan and abstract of the answer. Answers to theoretical questions. Completing practical tasks in the workbook. Reviewing the main sections of the course to prepare for testing	28	Oral survey, testing,

4.4. List of educational and methodological support for independent work of students

1. Barachevsky Yu.E. Fundamentals of mobilization training in healthcare: textbook. allowance for medical students universities, / Yu.E. Barachevsky, S.M. Groshilin, Arkhangel'sk. – 2011. – 95 p.
2. Belov S.V. Life safety: a textbook for universities / S.V. Belov, V.A. Devisilov, A.V. Ilnitskaya, etc. Under the general editorship of S.V. Belova, 8th edition, stereotypical - M.: Higher School. – 2009. – 616 p.: ill.
3. Sidorov P.I. Disaster Medicine: textbook. allowance for students medical universities, / P.I. Sidorov, I.G. Mosyagin, A.S. Sarychev - M.: Publishing house. Center "Academy", 2010. - 320 p.
4. Akimov V.A. Life safety. Safety in emergency situations of natural and man-made nature: textbook. allowance / V.A. Akimov, Yu.L. Vorobyov, M.I. Faleev et al. - M.: Higher School, 2007. – 592 p.
5. Levchuk I.P. Emergency Medicine. Course of lectures: textbook. allowance for medical universities/ I.P. Levchuk, N.V. Tretyakov - M.: GEOTAR - Media, 2011. -238 p.
6. Mikhailov Yu.M. Collection of instructions on labor protection for medical and pharmaceutical workers / Yu.M. Mikhailov. – M.: Alfa-Press Publishing House, 2010 – 208 p.
7. Mobilization preparation of health care. Textbook allowance / Ed. member corr. RAMS, prof. I.M.Chizha. M: GVKG im. N.N. Burdenko, 2011.
8. Mosyagin I.G. Organization of medical supply of formations and institutions intended for medical and sanitary provision of the population in emergency situations: textbook. manual - Arkhangel'sk: Publishing house of SSMU. 2007. – 100 p.
9. Safronov G.A., Aleksandrov M.V., Golovko A.I. and others. Extreme toxicology: textbook / Ed. G.A. Safronova, M.V. Alexandrova – St. Petersburg: ELBI-SPb, 2012. – 256 p.
10. Travkin A.K. Fire safety in medical institutions. – M., Infra-M, 2007. – 438 p.

V. ASSESSMENT FUND FOR CURRENT CONTROL AND INTERMEDIATE CERTIFICATION

The fund of assessment tools for determining the level of development of competencies as a result of mastering the discipline is an appendix to the work program.

VI. EDUCATIONAL AND METHODOLOGICAL SUPPORT OF DISCIPLINE

6.1. Main literature.

1. Sakhno I.I. Disaster Medicine: a textbook for medical students/ I.I. Sakhno, V.I. Sakhno - M.: GOU VUN MC MH RF, 2002 - 560 p.

2. Sakhno V.I. Organization of medical care to the population in emergency situations: textbook / V.I. Sakhno, G.I. Zakharov, N.E. Karlin, N.M. Pilnik - St. Petersburg: FOLIANT, 2003 - 248 p.

6.2. Additional literature.

1. Levchuk I.P. Disaster Medicine: Course of lectures: textbook / I.P. Levchuk, N.V. Tretyakov - M.: GEOTAR-Media, 2011 - 238 p.

2. Barachevsky Yu.E. Fundamentals of mobilization training in healthcare: textbook / Yu.E. Barachevsky, S.M. Groshilin - Arkhangelsk, 2011 – 95 p.

3. Shelepov A.M. Organization and tactics of medical service: textbook / A.M. Shelepov, L.M. Kostenko, O.V. Babenko O.V. - St. Petersburg: FOLIAN, 2005 – 504 p.

4. Website of the All-Russian Central Medical Center “Zashchita”, websites of the Ministry of Emergency Situations in the constituent entities of the Russian Federation, websites of the Ministry of Health and Rospotrebnadzor. Electronic library www.elibrary.ru, www.medline.ru

5. Order of the Ministry of Education and Science of Russia dated August 23, 2017. No. 816 On approval of the procedure for the use of e-learning and distance learning technologies by organizations engaged in educational activities in the implementation of educational programs.

6.3. Periodicals

1. Military medical journal
2. Disaster medicine

6.4. Internet resources

	ELECTRONIC EDUCATIONAL RESOURCES	Access to the resource
1.	Electronic educational library RostSMU [Electronic resource]. - Access mode: http://80.80.101.225/opacg	Access is not limited
2.	Student Advisor [Electronic resource]: EBS. – M.: LLC “IPUZ”. - Access mode: http://www.studmedlib.ru	Access is not limited
3.	Doctor's consultant. Electronic medical library [Electronic resource]: EBS. – M.: LLC GC “GEOTAR”. - Access mode: http://www.rosmedlib.ru	Access is not limited

4.	Single window of access to information resources [Electronic resource]. - Access mode: http://window.edu.ru/ [12.02.2018].	Open access
5.	Russian education. Federal educational portal [Electronic resource]. - Access mode: http://www.edu.ru/index.php [02/22/2018].	Open access
	Other Open resources can be found at: http://rostgmu.ru →Library→Electronic catalogue→Open Internet resources→further by keyword...	Open access

6.6. Guidelines for students on mastering the discipline using e-learning and distance learning technologies

The educational process will be carried out through:

- Moodle platforms
 - Email
 - Skype software
 - social network VKontakte.

In the process of distance learning, all relationships "teacher-student" and "student-student", within the framework of the implementation of educational programs, are carried out indirectly via the Internet.

Each student must ensure that they have an Internet browser and an Internet connection using a personal computer, laptop, tablet, mobile phone or any other convenient device.

The educational process is carried out remotely according to the schedule. All students attend training sessions online in accordance with the schedule.

The teacher will contact the leaders of student groups according to the schedule, notifying them of the start of the lesson. Group leaders inform the teacher about the group's readiness for distance learning, respectively, having previously surveyed all students in the group.

Having received assignments from the teacher, students independently and timely study the educational material provided for in the work program, strictly follow the instructions received, observing the time deadlines. Students provide the teacher with completed assignments in accordance with the established deadlines in order to receive timely comments, remarks and grades.

Lectures are given in streams on-line after registration of those present and presentations are shown. Students undergo ongoing monitoring in the form of completing test tasks on each topic covered. Interim certification in accordance with the curriculum. Monitoring of class attendance according to the schedule is maintained.

Students studying on the Moodle platform receive an email with a login and password and a link to the course. A reminder about working with the course is placed in each of the electronic training courses that the student masters. A student who has not provided information about his email to the leader of the student group contacts the teacher independently, having previously created an email and provided information about it.

Course structure of the academic discipline

When teaching students using distance learning technologies, the loaded training course includes the following blocks:

- Theoretical block: lecture notes, illustrated materials and presentations, multimedia elements, training test and self-control, orientation slide lectures, etc.
- Competency development block: tasks for filling out workbooks, solving situational problems and completing tests.
- Control and measuring unit: a database of test tasks and questions for self-control.
- Methodological block: work program, guide for students on studying the discipline, guide for teaching staff on teaching the discipline.
- Reference block: glossary. bibliography. annotated list of Internet resources. Regulatory and other documents.
- Information block: annotations of the discipline. information about the authors of the training course.

After creating a course, the teacher must sign students up for the course. who will study it. In their personal account, each student will see courses and test assignments in the schedule.

Current control

It is necessary to ensure that students have the opportunity to undergo ongoing monitoring for the entire semester at the LMS. To achieve this task, Moodle has extensive capabilities:

- The course element "Test" consists of 20 tasks with four possible answers, of which one is correct; time to solve is 20 minutes; two attempts. Moreover, a second attempt is possible after re-studying the lecture materials and watching the presentation. Each attempt is scored automatically and the score is recorded in the grade book.
- The "Assignment" learning element allows the teacher to collect student work, grade it and provide feedback. The final grade is recorded in the grade book.

Interim certification

Passing the intermediate certification in the form of a test is awarded based on the results of the current control. To do this, you are given the opportunity to pass the current control using the LMS before a certain date, which is posted on the course notice board.

Passing intermediate certification in the form of an exam is carried out based on the results of final testing in the SDO. In this case, the final semester grade is assigned based on current academic performance and the results of the final test as the arithmetic average plus 1 point at the discretion of the teacher as an incentive.

Methodological recommendations for writing an essay

Essay– a brief record of ideas contained in one or more sources, which requires the ability to compare and analyze different points of view.

An abstract is one of the forms of interpretation of the source text or several sources. Therefore, the abstract, unlike the synopsis, is a new, original text. Novelty in this case implies a new presentation, systematization of the material, a special author's position when comparing different points of view.

Abstracting involves presenting a question based on classification, generalization, analysis and synthesis of one or more sources.

Abstract specifics:

- does not contain detailed evidence, comparisons, reasoning, assessments,
- gives an answer to the question of what is new and significant contained in the text.

Abstract structure:

- 1) title page;
- 2) a work plan indicating the pages of each question, sub-question (item);
- 3) introduction;
- 4) a textual presentation of the material, divided into questions and sub-questions (points, sub-points) with the necessary links to sources used by the author;
- 5) conclusion;
- 6) list of used literature;
- 7) applications that consist of tables, diagrams, graphs, drawings, diagrams (optional part of the abstract).

Applications are arranged sequentially, according to headings that reflect their content.

Requirements for the preparation of an abstract.

The volume of the abstract ranges from 10-15 printed pages. The work is done on one side of a standard size sheet. On both sides of the sheet, margins of 35 mm on the left and 15 mm on the right are left, font size 14 is recommended, spacing is 1.5. All pages of the abstract must be numbered. Each question in the text must have a title in exact accordance with the name in the table of contents.

The abstract is assessed by the supervisor based on the indicators and criteria for assessing the abstract established by the department.

VII. MATERIAL AND TECHNICAL SUPPORT OF DISCIPLINE

No. p/p	Disciplines (modules):	Address (location) of classrooms, names of equipped classrooms, facilities for practical and laboratory classes, physical education and sports facilities with a list of main equipment	Equipment of the classroom (technical means, sets of demonstration equipment, laboratory equipment, etc.)
1	2	3	4
	Life safety. Emergency Medicine.	9th floor. ULK RostGMU, No. 902 (lecture hall) 24 student desks, 1 teacher's chair, 1 tribune, 1 student's wall board, 3 leather chairs.	Multimedia equipment. Screen. Demonstration equipment, stands: unified state system for emergency prevention and response; basics of civil engineering; NASF their organization, application and capabilities; organization of civil society

			<p>in cities and regions; actions of the population in response to civil defense warning signals; modern means of destruction; terrorism is a threat to society; organizational foundations and protection of the population in emergencies; classification of natural and man-made emergencies; actions of the population in case of accidents and disasters.</p>
		<p>9th floor.
